The NTU Institute of Health Technologies (HealthTech NTU) accelerates the development and translation of new technologies to solve health problems and improve quality of life.

Harnessing the breadth and depth of engineering that makes Nanyang Technological University one of the world’s top universities, along with the progressive Lee Kong Chian School of Medicine, and Singapore’s state-of-the-art health services, HealthTech NTU provides a place where research excellence in health, science, engineering, business, and policy converge.

We tackle health challenges with clinical precision, cutting edge research infrastructure, and expert interdisciplinary teams. Through effective partnerships, we help engineers and scientists deliver effective solutions and enable clinicians to provide better care. From nanomedicines to global health innovations, we are engineering the future of healthcare.

BE PART OF A GLOBAL NETWORK

We believe that even complex problems can be solved when the right people come together. HealthTech NTU tackles some of the Asia-Pacific region’s biggest health challenges by bringing together the best and brightest minds in Singapore and among our global partners.
