Jointly organised by:

Karolinska Institutet (KI), Nanyang Technological University (NTU) and Oral Health Academic Clinical Programme (ORH ACP) are long standing collaborators in dental research. In celebration of our shared commitment to advancing oral health research, the three institutions are hosting a joint research conference in Singapore from 4 to 5 November 2019. This biennial conference attracts clinicians and researchers interested in the latest developments in oral health research, with focus on 4 themes – orofacial medical technology and tissue regeneration, oral population health, oral microbiomics and clinical dentistry.
